WORK EXPERIENCE

Metropolitan Transportation Authority — New York
Manager, Supply Chain Analytics — Sep 2026 - Present

- Lead inventory and supply chain analytics initiatives across all Metropolitan Transportation Authority (MTA) agencies, primarily supporting Metro-North Railroad and Long Island Rail Road; develop analytical tools supporting inventory planning, procurement decisions, and monitoring of a $100M+ materials budget.
- Built comprehensive price-history analytics covering tens of thousands of inventory items, enabling item-level tracking of purchase price trends and identification of pricing outliers across historical transactions.
- Oversee dashboard developers and BI reporting delivery while contributing directly to Power BI development, SQL analysis, data validation, and reporting automation; work across a data environment comprising several dozen databases of varying types and scale, spanning Azure, Oracle, and other platforms.

Selected Cross-Industry Analytics and BI Engagements — Multiple locations (USA)
BI & Analytics Solutions Lead — Aug 2023 - Sep 2026

- Transportation Infrastructure — The Port Authority of New York & New Jersey — Developed Oracle SQL, Python, and Power BI analytics and executive reporting for tolling operations across 6 major bridges and tunnels recording 121.5M annual eastbound crossings and generating ~$2.14B in annual toll revenue; integrated and validated transaction and roadside systems data to identify anomalies and performance trends. Built contact-center dashboards and next-day call-volume forecasts supporting staffing and service-level planning for 20,000+ daily calls under a $40M+ multi-year contract; automated workflows using Microsoft 365.
- Higher Education — Eastern New Mexico University — Built advancement team analytics from the ground up at a public university, implementing a Microsoft Dynamics 365 CRM-connected Power BI reporting ecosystem and predictive analytics across 54,000+ constituent records; established the first single source of truth for fundraising performance and delivered executive dashboards and reporting for senior leadership and the Board of Regents.
- Construction & Distribution — Developed 2 comprehensive, client-facing Power BI demo dashboards for a BI consulting firm: one focused on construction project and financial performance, and one on distribution, inventory, margin, and customer analytics; both were used by the firm's co-founder in meetings with large prospective clients and helped advance business-development discussions.
- Industrial Logistics — Large Forestry & Pulp-and-Paper Group — Designed an integrated Power BI data model and reporting framework for raw-material and finished-goods logistics across multiple manufacturing plants within a major vertically integrated industrial group processing approximately 5M m^3 of timber and producing approximately 2M metric tons of finished products annually.

Freight One – one of Russia's largest rail freight operators — Moscow, Russia
Lead Data Analyst, Customer Journeys — Sep 2020 - Aug 2023

- Directed business intelligence and customer journey analytics, focusing on top customer segments representing approximately 80% of revenue, and supported over 20 customer-experience initiatives achieving a team-driven impact of 300M RUB (~$4M) in 2023.
- Developed and standardized Power BI dashboards, analytics toolkits, and customer pain-point reporting for 45 key account managers to enhance data-driven decision-making.
- Structured a CRM backlog of over 700 requirements in Jira to aid in implementation planning and product prioritization.

Gazpromneft-DS LLC – IT subsidiary of a top-tier Russian oil company St. Petersburg, Russia
Project Portfolio Manager Jul 2019 - Sep 2020

- Delivered comprehensive business continuity and IT portfolio analytics for critical logistics and upstream operations systems, encompassing requirements gathering, impact analysis, recovery workflows, incident-response scenarios, and quality review of consulting deliverables.
- Managed external consulting teams of 3-7 members and coordinated the successful delivery of 12 continuity plans across high-priority systems.

Business Lines – one of Russia's largest transportation and logistics providers St. Petersburg, Russia
Head of Business Process Analytics, Secretary to the Division's Board Nov 2015 - Jul 2019

- Managed analysts to deliver over 20 end-to-end process maps for key operations using BPMN and EPC standards.
- Developed portfolio prioritization and operational analytics tools, including a MILP optimization model and SQL-based performance reporting with more than 30 metrics.
- Created interactive dashboards and regression-based maintenance planning tools to enhance operational efficiency.

EDUCATION

Eastern New Mexico University Portales, NM
Master of Business Administration, Business Administration May 2026

California State University, Fullerton Fullerton, CA
Master of Science, Information Systems Jan 2025

St. Petersburg State University Russia
Master of Science, Business Informatics Jan 2022

St. Petersburg State University Russia
Bachelor, Corporate Economics, Innovations Management Jul 2012

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL-300), Microsoft 2026
Operations Research Specialization, National Taiwan University via Coursera 2026
Building AI Agents and Agentic Workflows Specialization, IBM via Coursera 2025
Google Data Analytics Professional Certificate, Google via Coursera 2024
Global Student Exchange Program (Remote), Tsinghua University, China 2019

SKILLS

Data Analysis • Data Visualization • Machine Learning • Agentic AI • Data Modeling • Business Intelligence • Power BI • Dax • Etl • Power Query • SQL • Oracle SQL • Python • Pandas • Scikit-Learn • PyTorch • Data Cleaning • OData • CRM • Microsoft Dynamics 365 • Reporting • Forecasting • Feature Engineering • Model Evaluation • Roc Auc • Precision/Recall • A/B Testing • Scenario Analysis • LangChain • LangGraph • Power Automate • SharePoint • Excel • Financial Modeling • Portfolio Optimization • Process Analytics • Agile • Jira • Confluence • Asana • Azure
