SUMMARY

Senior BI / Data Analyst and BI Lead with experience building end-to-end reporting ecosystems, CRM-connected analytics, executive dashboards, and applied ML solutions across U.S. and international organizations. Strong hands-on background in Power BI, DAX, SQL, Python, OData/API integrations, ETL, data modeling, and stakeholder-facing analytics. Known for turning fragmented operational data into trusted decision-making tools.

Permanent resident: EB-1A (Extraordinary Ability). U.S. work authorized. No visa sponsorship required.

WORK EXPERIENCE

Eastern New Mexico University

Data Analytics Lead

Portales, NM

May 2025 - May 2026

- Led end-to-end reporting implementation for a Microsoft Dynamics-based CRM go-live, gathering requirements from senior leadership and building reporting both inside the CRM and in Power BI through OData/API integration; delivered executive visibility for the President/VP, Advancement leadership, and Board of Regents.
- Built the organization's first single source of truth for plan-vs-actual performance analytics, initially launching Power BI reporting on manual Excel-based inputs to keep the process live before CRM go-live, then migrating reporting to CRM-connected data pipelines; delivered 5 interactive Power BI dashboards covering KPI tracking, portfolios, constituent profiles, giving analytics, and Annual Fund progress for up to 20 leadership users.
- Developed a Python-based predictive prospect/lead prioritization system using 54K+ records and 50+ data points, combining feature engineering, logistic regression, random forest, model validation, lift analysis, and rule-based scoring to generate probability scores, expected value, final priority scores, recommended segments, and recommended actions; leadership used the model to plan FY2027 portfolio strategy.
- Prototyped privacy-preserving AI and analytics tools, including local LLM/LangChain agents and SQL-based test datasets built from selected CRM and external data sources, enabling natural-language exploration of structured data without exposing sensitive organizational data.

The Port Authority of New York and New Jersey

Management Intern, Continuous Improvement

New York, NY

May 2024 - Dec 2024

- Built Power BI reporting prototypes and Microsoft 365 automation workflows for continuous improvement and PMO use cases, streamlining project portfolio tracking across Power Automate, SharePoint, Planner, and Lists.
- Designed a CRISP-DM-based workflow for AI/ML initiatives to standardize scoping, data preparation, validation, and delivery; demonstrated applied analytics use cases including crew scheduling optimization and customer pattern identification.
- Supported customer journey mapping across JFK, EWR, and LGA and created a prioritization framework for 500+ team-generated initiatives, helping leadership focus on high-impact customer experience improvements.

Freight One – one of Russia's largest rail freight operators

Lead Data Analyst, Customer Journeys

Moscow, Russia

Sep 2020 - Sep 2023

- Led BI and customer journey analytics for one of Russia's largest rail freight operators, analyzing top customer segments representing ~80% of revenue and supporting 20+ customer-experience initiatives with measured team-driven impact of 300M RUB (~\$4M) in 2023.
- Built and standardized Power BI dashboards, analytics toolkits, and customer pain-point reporting for 45 key account managers; structured a 700+ requirement CRM backlog in Jira to support implementation planning and product prioritization.

Gazpromneft-DS LLC – IT subsidiary of a top-tier Russian oil company

St. Petersburg, Russia

Project Portfolio Manager

Jul 2019 - Sep 2020

- Delivered business continuity and IT portfolio analytics for critical systems supporting logistics and upstream operations, including requirements gathering, impact analysis, recovery workflows, incident-response scenarios, and quality review of consulting deliverables.
- Managed external consulting teams of 3-7 members and coordinated delivery of 12 continuity plans across high-priority systems.

Business Lines – one of Russia's largest transportation and logistics providers

St. Petersburg, Russia

Head of Business Process Analytics, Secretary to the Division's Board

Nov 2015 - Jul 2019

- Led business process analytics for the Less-than-truckload division, managing analysts and delivering 20+ end-to-end process maps for mission-critical operations using BPMN and EPC standards.
- Built portfolio prioritization and operational analytics tools, including a MILP optimization model, SQL-based performance reporting with 30+ metrics, interactive dashboards, and regression-based maintenance planning.

EDUCATION

Florida Atlantic University

Boca Raton, FL

Ph.D., Business Administration (IT and Operations Management)

Aug 2029 (anticipated)

Eastern New Mexico University

Portales, NM

M.B.A. (online), Business Administration

May 2026, GPA 4.00

California State University, Fullerton

Fullerton, CA

M.S., Information Systems

Jan 2025, GPA 3.93

St. Petersburg State University

Russia

M.S., Business Informatics

Jan 2022, GPA 3.86

St. Petersburg State University

Russia

B.S., Corporate Economics, Innovations Management

Jul 2012, GPA 3.15

CERTIFICATIONS

Operations Research Specialization, National Taiwan University via Coursera

2026
